

# Correlation Analysis on Skincare Keywords

- Product Team
- Yuan Ding

# Data Sources

- ◆ **1811** articles from **5** main skincare blogs: Into The Gloss, Dermstore, b-glowing, Skinstore, Askderm.
- ◆ Year Range: recent **Five** years (2015-2019)
- ◆ Topic: all **skincare**

# Method

---

- ◆ Use **web crawler** to retrieve the information (four columns: url, title, author and date, content) of each article in the website to form our **raw data frame**
- ◆ Analyze the text by checking if it contains a specific keyword in our keyword list (we have four kinds of keywords: **problems**, **products**, **season** and **ingredients**)
- ◆ Then conduct correlation analysis based on the **frequency** of occurrence of each keyword
- ◆ **Main packages:** Python (requests, BeautifulSoup, urllib, numpy, pandas)

# Final Data Frame

# Part I: Univariate Analyses

- Top 10 skin problems/concerns

# Part I: Univariate Analyses

- The most mentioned product types

# Part I: Univariate Analyses

- Top 10 popular ingredients

# Part I: Univariate Analyses

- Translation to products (1)
  - ◆ **Serum** is popular and highly mentioned these years (ranked #3, good to know!)
  - ◆ 5 functions our serum might have: **anti-aging**(wrinkles), **moisturizing**, **skin smoothing**(deal with acne/ clogged pores), **brightening**, **mild**(sensitive skin friendly, reduce redness)
  - ◆ Ingredients we may consider using for each function:
    - Hyaluronic acid (moisturizing)
    - Vitamin C (brightening, anti-aging)
    - Retinol/retinoid (anti-aging)
    - Salicylic acid (anti-acne, smoothing)

## Part II: Bivariate Analyses (correlations)

- Skin type & problems

	Smooth	Aging	Wrinkle	Fine line	Acne	Dark spot	Pigmentation	Blemish	Pore	Redness	Rosacea	Brighten	Firmness
<b>Dry skin</b>	0.486	0.565	0.428	0.363	0.473	0.128	0.202	0.130	0.479	0.353	0.144	0.322	0.051
<b>Oily skin</b>	0.557	0.597	0.453	0.343	0.667	0.149	0.244	0.254	0.667	0.313	0.149	0.348	0.040
<b>Combination skin</b>	0.638	0.550	0.450	0.388	0.588	0.138	0.188	0.288	0.713	0.450	0.163	0.338	0.088
<b>Sensitive skin</b>	0.500	0.583	0.409	0.338	0.520	0.129	0.242	0.172	0.465	0.381	0.187	0.338	0.073

## Part II: Bivariate Analyses (correlations)

- Define “correlation”
  - ◆ The “**correlation**” here refers to the percentage of articles containing another keyword in the articles containing a specific keyword. e.g. we have 292 articles containing the keyword “dry skin”, the correlation value “0.486” means that among all 292 articles, 48.6% of them also contain the keyword “smooth”.
  - ◆ It is not the exact definition in statistics!
  - ◆ In our analysis, we find out that if the “correlation” is higher than 0.4, then the two keywords can be seen as “**highly correlated**”.

# Top 10 Dry Skin Concerns

---

# Top 10 Oily Skin Concerns

---

# Top 10 Combination Skin Concerns

---

# Top 10 Sensitive Skin Concerns

---

## Translations (2)

- Some concerns are for all skin type : **aging, smoothness, acne, pore, wrinkle** (our product/skin report should emphasize these!)
- According to different skin type:
- **Oily/combination skin** is easier to have acne, blemish or pore problems
- **Combination/sensitive skin** is more likely to encounter redness/rosacea
- **Combination skin** cares more about firmness and smoothness
- **Sensitive skin** cares more about firmness

## Part II: Bivariate Analyses (correlations)

- Skin type & products

	Cleanser	Exfoliator	Serum	Spf	Cream	Eye Cream	Lotion	Toner	Mask
<b>Dry skin</b>	0.455	0.428	0.473	0.353	0.606	0.110	0.257	0.195	0.366
<b>Oily skin</b>	0.547	0.517	0.537	0.403	0.567	0.119	0.269	0.274	0.408
<b>Combination skin</b>	0.475	0.400	0.525	0.475	0.675	0.175	0.313	0.238	0.388
<b>Sensitive skin</b>	0.485	0.442	0.442	0.396	0.596	0.131	0.278	0.179	0.331

**All skin types use serum!**

## Part II: Bivariate Analyses (correlations)

- Season & problems/products

	Smooth	Aging	Wrinkle	Fine line	Acne	Dark spot	Pigment ation	Blemish	Pore	Redness	Rosacea	Brighten	Firmness
<b>Spring</b>	0.443	0.523	0.282	0.242	0.356	0.047	0.141	0.121	0.336	0.322	0.114	0.255	0.060
<b>Summer</b>	0.411	0.435	0.202	0.162	0.348	0.071	0.138	0.119	0.344	0.209	0.059	0.233	0.051

## Part II: Bivariate Analyses (correlations)

- Season & products

	Cleanser	Exfoliator	Serum	Spf	Cream	Eye Cream	Lotion	Toner	Mask
Spring	0.389	0.302	0.443	0.456	0.591	0.101	0.302	0.148	0.369
Summer	0.304	0.308	0.387	0.490	0.609	0.079	0.364	0.142	0.364
Autumn	0.318	0.364	0.379	0.293	0.535	0.131	0.177	0.162	0.409
Winter	0.358	0.345	0.425	0.381	0.646	0.102	0.296	0.150	0.385
Holiday	0.316	0.316	0.388	0.235	0.510	0.112	0.224	0.071	0.378
Travel	0.295	0.404	0.367	0.295	0.536	0.151	0.289	0.175	0.458

# Translations (3)

- We didn't see a significant difference in the product use or preference, although there is some slight difference.
- **Dry skin** uses **cream** while **oily skin** uses more **cleanser**, **exfoliator** and **toner**, which is much lighter for oily skin.
- Serum is used among **all skin types**, **all seasons**, only the emphasis will be slightly different.
- **Spring** is relatively higher correlated with **redness** and **rosacea** (pollen or seasonal change)
- We easily have **dark spots/pigmentation** problems in autumn, and we need **brightening** (bad sunlight in summer)
- In **spring/summer** the product emphasize **SPF** while in **autumn/winter** we emphasize **moisturizing**

# Part II: Bivariate Analyses (correlations)
